

STUDENTS' QUALIFICATIONS AND MARKET-NEEDED COMPETENCIES GAP ANALYSIS FINDINGS: JORDAN

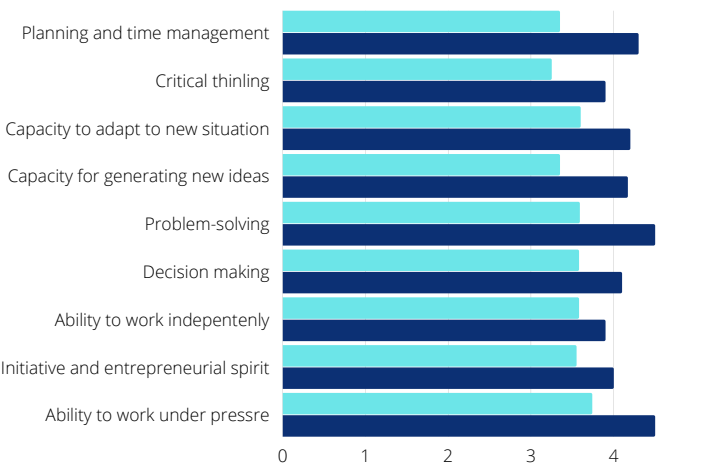

The Gap Analysis is a part of STREAM project (University Student Capacity Building: Towards Readiness for Sustainable Development-Oriented Regional Job Market), co-funded by the Erasmus+ Programme of the European Union.

The aim of the analysis is to **increase the awareness of the current regional employability & market-needs compatibility situation and pave the road for guided development of the project activities.**

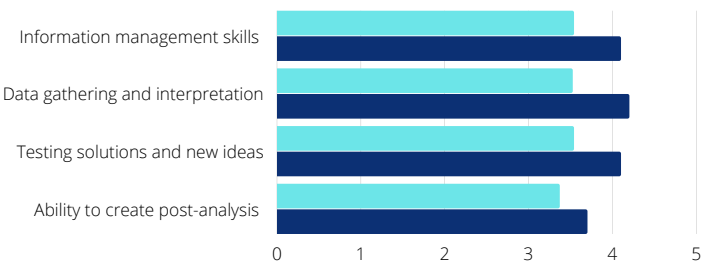

The competency gap of students' qualifications and market-needed competencies has been mapped with the use of two online surveys, developed in close cooperation of the STREAM consortium: (1) targeted at current students of ITC fields, as well as recent graduates in ITC; (2) targeted at Employers, Trainers and HR staff from companies hiring in the ICT fields).

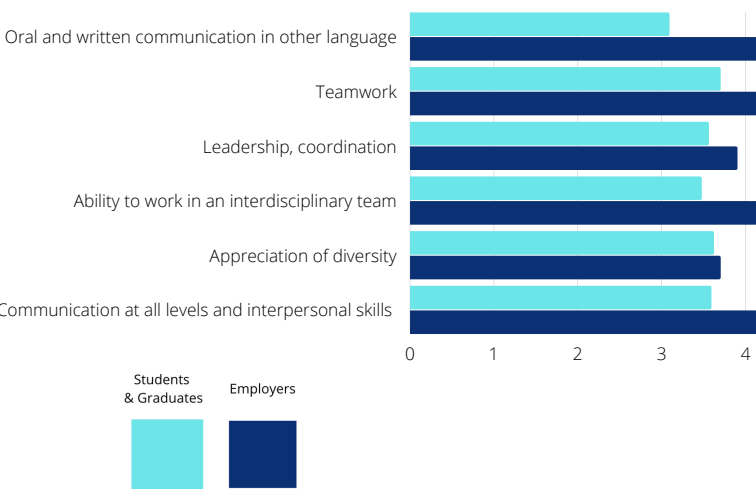

PERSONAL SKILLS

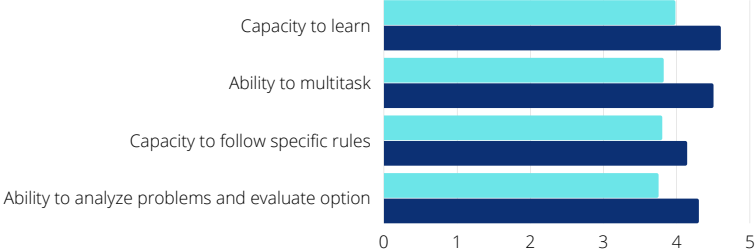

ANALYTICAL SKILLS

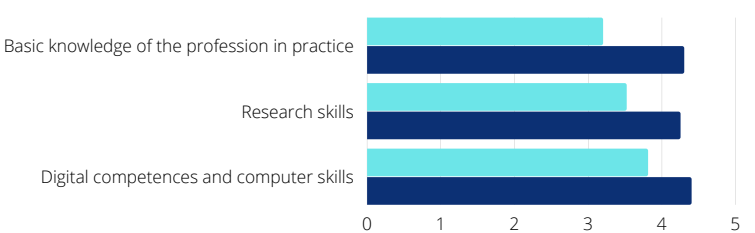

SOCIAL SKILLS

COGNITIVE SKILLS

INTELLECTUAL SKILLS

The third and final component of the gap analysis is identifying and defining the exact roadmap to bridge the identified gaps identified, through an analysis of the practices of project partners in terms of methodologies to implement academic-complimentary skills and competencies within the courses. To get familiar with the findings, please get familiar with the Gap Analysis document of the STREAM project.
